

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-6. (canceled)

7. (currently amended) A method of providing electronic mail notification to a calling communications device, comprising:

formulating a user specific retrieval profile designating user specified pre-designated information relating to a calling communications device;

associating an email with a first phone number, said email comprising said user ~~caller~~ specified pre-designated information associated with call related information relating to said calling communications device;

receiving a call from said calling communications device; and

using said call related information from said call to automatically identify and provide said email to said calling communications device after said calling communications device calls a first phone number and without answering said call to said first phone number from said calling communications device.

8. (previously presented) The method of providing electronic mail notification to a calling communications device according to claim 7, further comprising:

obtaining a communications device identifier when said calling communications device dials said first phone number; and

using said communications device identifier to select said electronic mail message.

9-25. (canceled)

26. (currently amended) A method of retrieving information by a first calling device from a second device, comprising:

formulating a user specific retrieval profile designating user specified pre-designated information relating to a first calling device;

receiving a call from ~~[[a]]~~ said first calling device associated with a first telephone number intended for ~~at~~ a second device associated with a second telephone number;

associating said user specified ~~specific~~ pre-designated information with call related information relating to said first calling device;

using said call related information to automatically retrieve said user ~~specific~~ specified pre-designated information in response to said call from said first calling device without a need for said second device to answer said call from said first calling device; and

transmitting said retrieved user ~~specific~~ specified pre-designated ~~desired~~ information to said first calling device.

27. (currently amended) The method of retrieving information by a first device from a second device according to claim 26, further comprising:

transmitting said retrieved user specified ~~specific~~ pre-designated information in a short message to said first calling device.

28. (currently amended) The method of retrieving information by a first device from a second device according to claim 26, further comprising:

determining said first telephone number from said call related information associated with said call to said second telephone number by said first calling device.

29. (previously presented) The system for allowing a first device to retrieve information from a second device according to claim 26, wherein:

said call related information is caller ID.

30. (currently amended) A system for retrieving information by a first device from a second device, comprising:

means for formulating a user specific retrieval profile designating user specified pre-designated information related to a first calling device;

means for receiving a call from [[a]] said first calling device associated with a first telephone number intended for at a second device associated with a second telephone number;

means for associating user specified specific pre-designated information with call related information relating to said first calling device;

means for ~~using said call related information to~~ automatically ~~retrieve~~ retrieving said user specified specific pre-designated information using said call related information in response to said call from said first calling device without a need for said second device to answer said call from said first calling device; and

means for transmitting said retrieved user specified specific pre-designated ~~desired~~ information to said first calling device.

31. (currently amended) The system for retrieving information by a first device from a second device according to claim 30, further comprising:

means for transmitting said retrieved user specified specific pre-designated desired information in a short message to said first calling device.

32. (currently amended) The system for retrieving information by a first device from a second device according to claim 30, further comprising:

means for determining said first telephone number from call related information associated with said call to said second telephone number by said first calling device.

33. (previously presented) The system for allowing a first device to retrieve information from a second device according to claim 30, wherein:

said call related information is caller ID.
